Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Schuller et al.

(5,123,819). Schuller et al. discloses a piston pump with a pump housing 10 with an installation space, a bushing 13 that is inserted into the installation space and axially guides a pump piston 12 that can be driven into a stroke motion, a pressure chamber 18 whose volume can be changed by the stroke motion of the pump piston 12, a pressure fluid inlet 19 and pressure fluid outlet 29 connected to the pressure chamber 18, the pressure fluid outlet 29 being routed at least partway along a section of the circumferential surface of the bushing 13, and a filter 30 and a throttle 30

in the region of the section extending along the circumferential surface, the filter 30 and throttle 30 being of one piece with the bushing 13.

Allowable Subject Matter

Claims 12-30 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of eight patents.

Alaze, Merklein et al., Hauser et al., Siegel et al., Schneider et al., Wupper et al., Stegmaier, and Schuller et al. '300 are cited to show piston pumps with throttles, filters, and damping elements.
